The RGB CT400 WiFi Control System provides powerful wireless color control for Color-Changing RGB LED Lights over your wifi network, letting you create distinct zones, each with their own color-changing patterns or static colors. Whether you have a large installation where you want different areas to display different colors or patterns, or a setup where a single set of lights can be controlled with multiple remotes, this exciting system fits the bill. Various types of LED lighting products can be controlled by installing the APP on the user's iOS or Android mobile device which supports WiFi connection.

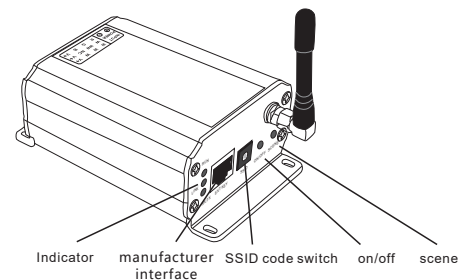

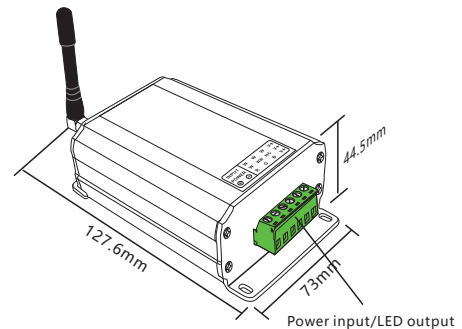

FEATURES

- Compatible with smart devices
- Android and iOS Compatible
- Optional RF Handheld Remote (Sold Separately)
- 32 Fixed RGB Modes, 8 DIY Modes
- Scene Mode: RGB 9 Modes, CT3 Modes
