

INSTALLATION GUIDE

WARNING: RISK OF ELECTRICAL SHOCK
** turn off main power prior to installation*
** make sure hands are dry*
** never touch exposed wires*

Measure the desired size to be cut. Round off to the nearest square inch interval. LFS-2412 can be cut vertically or horizontally following the guide lines.

For relatively flat surfaces, the adhesive backing is sufficient to adhere the LFS-2412 to the installation surface. Simply peel off backing to expose adhesive and gently adhere to surface.

For rough or textured surfaces, you may use a staple gun or secure the LED sheet with nails or screw it onto place. The LFS-2412 has built-in holes for this purpose.
