INSTALLATION GUIDE

## For ALP2400TL series profiles

⚠️ **1. This product is intended to be installed by an experienced electrician.**
2. Make sure to TURN OFF MAIN POWER prior to installation of any electrical device.
3. This product is designed for OUTDOOR use

1 Drill a hole in the ALP2400TL profile to accommodate the power feed cable

2 Mount LED Strip onto the profile, lead the power feed cable out carefully onto the hole you previously drilled, then attach the end caps. Screw the end caps securely to fasten it into place.

For ALP2400TL series profiles

⚠ **1. This product is intended to be installed by an experienced electrician.**
2. Make sure to TURN OFF MAIN POWER prior to installation of any electrical device.
3. This product is designed for OUTDOOR use

3 Attach the fixture to the installation surface by securing it onto place with screws. Make sure to use the appropriate screws designed for metal.

4 Apply a layer of plaster over the flanges and onto the wall to cover the flanges and create an even surface. Do this for both sides attaching to the wall. Once dry, apply paint to finish the surface.
