

**INSTALLATION GUIDE**

**DIMENSIONS**

**PRE-INSTALLATION**

**Surface Mount**

Disconnect power source prior to installation.

**SAFETY**

Read all instructions before installation.

These products may represent a possible shock or fire hazard if improperly installed.

Do not look directly into light.

This fixture is only suitable for indoor installation.

Product should be installed by a qualified electrician.

Product should be installed in accordance with these instructions and current electrical codes.

**INSTALLATION**

STEP 1

Align the profile on your chosen mounting surface. Using a pencil, mark and measure where your channel and mounting clips will be placed. (Figure 1)

STEP 2

If needed, snap the lens into the channel and cut to the desired length using a blade suitable for aluminum (Figure 2). Then, separate the lens from the channel and clean any debris from the extrusion.

STEP 3

Peel the adhesive backing of the LED strip and install onto the channel. Then, carefully snap the lens back in place on the aluminum channel. (Figure 3)

*\*Make sure that the LED strip is laid evenly flat on the channel. This will avoid having any dark spots once lit up.*

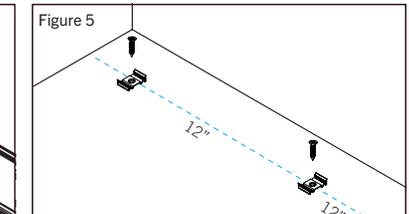

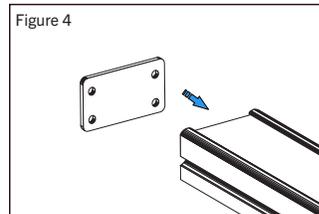

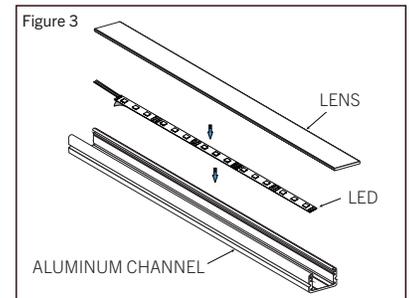

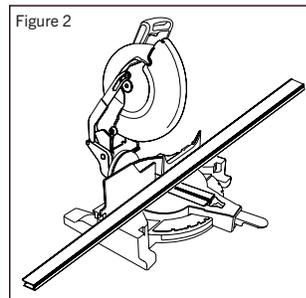

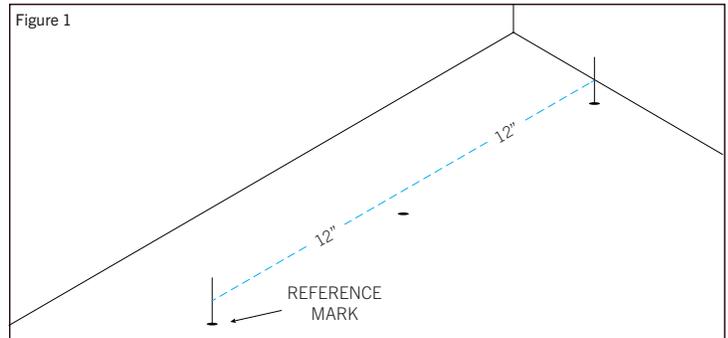

STEP 4

Install the endcaps at the ends of the extrusion, making sure to feed the LED tape wires through the endcap with a hole. (Figure 4)

STEP 5

Using appropriate hardware, secure the mounting clips along your marked mounting surface. (Figure 5)

*\*Factory recommends using one mounting clip every 12 inches.*

## INSTALLATION (CONT.)

STEP 6

Gently push the extrusion into the installed mounting clips.  
(Figure 6)

STEP 7

Wire as needed.
