The **ALP-240N** is an Architectural Grade LED extrusion profile designed to fit linear LED strips up to 37mm wide. It can be surface, suspended or recessed mount. It features optional corner / angle connectors for seamless attachments. Made from high quality aluminum, these extrusions provide superior thermal management for higher wattage LED strips and prolong the overall lifetime of your lighting system. The ALP-240N is manufactured with a patented frosted diffuser for maximum lumen output and wide beam distribution. The ALP-240N also helps protect LED's from dust and other undesirable elements, which can shorten the lifetime of the LED.
